

Guidelines for printing poster files at Hampton

Sending Files

- Files less than 10mb can be emailed to images@hamptonprints.com.
- Larger files can be sent via a file transfer service such as dropbox or through ftp.

Turnaround

- If the files are in good shape, 3 or fewer posters measuring 60x48 inches will take less than 5 business days.

Pricing

- We can print a poster up to 60"x48" on our standard banner fabric for \$20. Payments can be paid through Paypal to payments@hamptonprints.com or with a credit card through the 'pay us' tab on our Web Site.
- There may additional charges if the requires color matching or additional artwork.
- Shipping charges are not included

File formats accepted for all applications:

- **Rasterized files:**
 - **Indexed tiffs** – file extension is .tif and image mode is Indexed Color.
 - **Other tiffs** – Image mode may be RGB, Lab, CMYK. Please embed ICC profile
 - **High resolution jpegs**. Jpegs are a "lossy" compression format and it is NOT recommended you save your files as jpegs. However, if you have very high resolution jpegs we can convert them to the type of file we need.
 - A resolution of **300 pixels/inch(dpi)** is recommended for art files. For photographic files or images that will be scaled up, higher resolution may be needed. The 300 dpi will assure that images are not pixilated.
- **Vector files** – please embed ICC profile
 - **.pdf**
 - **.ai** – Adobe Illustrator.

Posters can be picked up at:

- Hampton Textile Printing
2230 Eddie Williams Road
Johnson City, TN 37601

Feel free to email me with questions or when you have sent your files at jwalker@hamptonprints.com
