SCHOLARSHIP
An engineering scholarship is available for eligible students declaring an engineering major at the point of application. This can be combined with other institutional merit scholarships. Students also may be eligible for need-based, state, and federal aid. Scholarships are limited, so apply early.

FACILITIES
Milligan’s engineering labs, located in the B. D. Phillips Building, include applied-specialization labs for hands-on experimentation and class discussion, multi-disciplinary design labs for student capstone projects, and a maker-space lab. At Milligan, engineering education provides multiple opportunities for students to practice hands-on design in a multi-disciplinary environment.

ACCREDITATION
The Milligan engineering majors have been reviewed and approved by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). Milligan also will seek accreditation from the Accreditation Board for Engineering and Technology (ABET). Accordingly, our program has been designed to meet their accreditation standards. Our engineering faculty are experienced and seasoned academicians who have been core faculty members in ABET-accredited programs. More information can be found at www.abet.org.
