MILLIGAN SEXUAL MISCONDUCT POLICY: BYSTANDER INTERVENTION

Bystander Intervention Basics

- Safe and positive options to prevent harm or intervene in situations of potential harm
- Bystanders witness inappropriate behaviors such as sexual assault or harassment and choose to act by speaking up
 or reporting these observations.
- Active bystanders have a significant impact on sexual misconduct prevention by promoting and standing up for a culture of respect.

Effective Intervention: Decision-Making Process

- 1. **Notice** the event.
- 2. Interpret the event as a **problem**.
- 3. Assume personal **responsibility** for intervening.
- 4. Identify a safe and appropriate method for intervention.
- 5. Use acquired skills to **effectively** intervene.

Four "D" Bystander Intervention Technique

- **Distract**: Interrupt the situation without directly confronting the parties involved. Example: Stepping in to ask questions that can divert a person's attention and shift their behavior toward less risky situations (getting something to eat, talking about work or classes, etc.)
- **Delay:** Check in and follow up on potentially troubling situations when you are not sure if the situation is safe or you or you are not able to immediately intervene.
- Delegate: Report to campus authorities or identify other bystanders who can assist you in safely intervening.
- Direct: Only when safety is certain, intervene directly to make the parties aware that there is a problem and it has been noticed.

Rules for Effective Bystander Intervention

- DO NOT intervene in a way that puts yourself or others at risk of physical harm
- DO NOT intervene in a way that escalates the situation or makes it worse—Use direct confrontation only if other
 methods of intervention are not appropriate under the circumstances
- DO look for early warning signs of trouble
- **DO** intervene at the earliest point possible
- DO ask for help from other bystanders or responsible persons (such as Police or Campus Security)
- **DO** remember that effective intervention does not always require dramatic action—even small gestures or comments can have a large impact on the outcome of a troubling situation (before and/or after the fact)

Show up. Stand up. Speak Up. Be an active bystander!

MILLIGAN SEXUAL MISCONDUCT POLICY: RISK REDUCTION

Risk Reduction Basics

Options designed to:

- Stop sexual misconduct and inappropriate behavior before it starts.
- Decrease perpetration and bystander inaction.
- Increase empowerment for victims in order to promote safety.
- Help individuals and communities address conditions that facilitate violence.

While risk reduction strategies can help deter both victimization and perpetration, it is important to understand that **risk reduction is not victim blaming. Perpetrators** of sexual misconduct, and them alone, **are responsible for their acts**.

Reducing the Risk of Victimization

- Be aware of your surroundings at all times.
- Trust your instincts.
- Make limits and/or boundaries known as early as possible
- Tell a sexual aggressor "no," as clearly and firmly as possible
- Remove yourself, if possible, from an aggressor's physical presence
- Reach out for help when needed
- Make responsible decisions regarding drug and alcohol use
- Look out for your friends and ask them to look out for you

Reducing the Risk of Perpetration

- Commit to a Culture of Respect in all interactions, including in relationships.
- Learn and respect personal **boundaries**, including in language and content sharing.
- Understand that others may be intimidated by you, even if that's not your intent.
- Communicate intentions clearly and listen to what others are communicating to you.
- Don't make **assumptions** about consent; unclear ‡ consent.
- Take "No" for an answer.
- Don't take advantage of others' **incapacitation**.
- Learn and understand information and policies about sexual misconduct and healthy relationships.
- Understand that what may be welcome language or behavior by one person may not be welcome by others.

Understanding Consent

Understanding **consent** is an essential part of engaging in healthy relationships and the prevention and awareness of sexual misconduct. Consent is the agreement to participate in sexual activity which is **voluntary** (consent is not possible when coercion, force, or threat is present), **aware** (consent is impossible when incapacitation occurs for any reason), **clear** (silence or absence of resistance does not imply consent), **immediate** (past consent does not imply future consent), **continuous** (consent can be withdrawn at any time), and **specific** (consent with one person does not imply consent with others).
